**Summary** Software Developer building scalable and responsive web applications, currently pursuing a B.E. in Computer Science at Indira College of Engineering & Management (GPA: 8.43) with experience in both front-end and back-end development.

**Experience** **Gryphon Academy Pvt Ltd** Banner , Pune  
Intern Software Developer September 2025 - March 2026

- Developed a full-stack feedback system with role-based access for Students, Trainers, Admins, and Super Admins. Automated session creation, collected structured feedback, and generated analytics dashboards to evaluate training effectiveness while enforcing secure data isolation across roles.
- Designed and implemented a **role-based leaving certificate generation system** with multi-level approval workflows, ensuring strict access isolation between **students, admins, and superadmins**.
- Contributed to a **CRM budget management module** by developing backend workflows for **budget allocation, vendor management, and purchase order processing** across multiple departments.

**Education** **Indira College of Engineering and Management** B.E. (Bachelor of Engineering) • 8.43  
Computer Science Aug 2022 – May 2026

**Skills**

<b>ReactJs</b>	<b>NextJs</b>	<b>Tailwind CSS</b>	<b>SpringBoot</b>	<b>NodeJs</b>
<b>ExpressJs</b>	<b>Restful API's</b>	<b>MySQL</b>	<b>PostgreSQL</b>	<b>MongoDB</b>
<b>FireBase</b>	<b>Git &amp; GitHub</b>	<b>PostMan</b>	<b>Maven</b>	<b>JAVA</b>
<b>C &amp; C++</b>	<b>Python</b>	<b>Javascript</b>	<b>Prisma</b>	<b>Hibernate</b>

**Projects** **BlindSpark**  
BlindSpark is a real-time video communication platform designed to promote authentic, unbiased human interaction. It connects users through short, time-bound video sessions without relying on profiles, enabling spontaneous and meaningful conversations. The system uses intelligent matchmaking based on shared interests and language preferences to ensure relevant and engaging interactions.

**Tech Stack:** Node.js, React.js, Tailwind CSS, WebSockets, WebRTC, Firebase.

### Live pool

A **Live Poll Application** is a real-time web-based platform that allows hosts to create interactive polls and collect instant responses from participants. Users can join polls using a unique code or QR code and submit their votes seamlessly, while results are updated and visualized live on the screen.

**Tech Stack:** Node.js, React.js, Tailwind CSS, Firebase
